

Informed oral consent

- The participant understood she/he is taking part in a research project, and freely consent to participate.
- The participant understood what kinds of information is collected and what materials will be carrying away from the interview.
- The participant understood how the information will be used.
- The participant understood she/he can withdraw from the study at any time, and request that any materials implicating her/him to be destroyed.
- The participant knows who to contact if she/he has any questions or concerns about the research and was provided with contact information of the researcher/interviewer.

Declaration of the interviewer:

The participant's consent was orally given after I explained the purpose of the research and all the above issues and made sure they were understood.

Name of the interviewer: _____
